

Work more efficiently with Muse's robust design features. LCD Touch Screen Interface puts the power of Muse at your fingertips. Achieve sharper alignment and translate hand drawings with an embedded camera system. Use the rotary and rotary riser attachments for rounded items. Go "out-of-the-box" with Muse's removable floor.

Built-in LCD Touchscreen

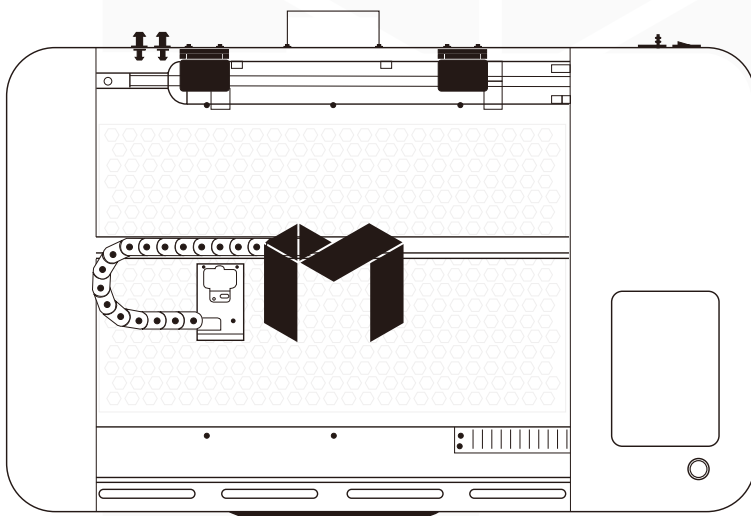

Rise and Rotary Attachment (Optional)

RETINA ENGRAVE

Muse makes it easy to design in your favorite program and instantly transition to cutting your material. Use any design software, including 3D modeling programs, and bring your ideas to life with exclusive RetinaEngrave v2 software 100% developed by FSL.

Marking · Cutting · Engrave
